Script-Controlled ACL – Restrict Record Access Based on Field Value

Phase 8 – Project Demonstration Phase

Team Leader: K. Amirthalakshmi | Team Members: Aisha Sahana S, Aishwarya S, Abirami S

Purpose

• Present the completed ACL project through a clear screen recording and voice explanation.

Introduction

• State the project name.

• Introduce the four team members.

• Explain the problem and purpose.

Benefits

• Consistent field-based access control.

• Uses ServiceNow ACL capability.

• Provides a clear security decision.

• Supports maintainable configuration.

Demo Sequence

• Show the table.

• Show the controlled field.

• Show the ACL.

• Show the script/condition.

• Demonstrate allowed and restricted cases.

Script-Controlled ACL – Restrict Record Access Based on Field Value

Phase 8 – Project Demonstration Phase – Continued

Voice Explanation

• Explain what the project does, why the ACL is required, which field is checked, and how the decision is produced.

Final Output

• Show the allowed result.

• Show the restricted result.

• Summarize how the field value controls access.

Recording Checklist

• Clear screen.

• Audible voice-over.

• Project name, purpose and benefits.

• Working process and final output.

Submission Preparation

• Create public GitHub repository.

• Upload eight phase-wise PDFs and required files.

• Upload demo to Google Drive.

• Set sharing to anyone with the link can view.

• Check links before submission.

Outcome

• The evaluator can understand the purpose, configuration, working process and final access behavior.
